

REMARKS

The specification has been amended to identify information relating to the international application and priority application of the present application.

In the specification and claim 1, the terminology "containing in the backside layer" has been amended to read "containing, as the pigment, in the backside layer". Support for this amendment can be found on page 3, line 5 and page 6, line 31 of the specification.

Throughout the specification, "ethylene oxide adduct(s) of perfluoroakyl" has been amended to read "ethylene oxide adduct(s) of perfluoroakyl amide". This correction is supported by the description on page 27, lines 3-4, where it is described that said "ethylene oxide adduct of perfluorakyl" is a product commercially available under the trademark of "Surflon S-145" manufactured by Seimi Chemical Co., Ltd.

According to the enclosed catalog of Surflon (page 6, column "S-145", rightmost column of the table), "Surflon S-145" is "EO adduct of perfluorakyl amide" which means "ethylene oxide adduct of perfluoroakyl amide". Please note that the term "EO" stands for ethylene oxide, as is well-known, and also is suggested by the footnote on page 5 of the catalog (E=ethylene oxide content (%)).

In the paragraph beginning on page 15, line 25, "2-hydroxy

acrylate" has been deleted.

The dependency of claim 8 has been amended from claim 6 to claim 7. Support for this amendment can be found on page 4, line 15.

In the event any additional fees are required, please also charge our Deposit Account No. 111833.

Respectfully submitted,

KUBOVCIK & KUBOVCIK
